### For IMMEDIATE RELEASE

MediHeroes announces an official launch of International Medical Device(IMDS) School Korea on Dec 01, 2020.

Seoul, Korea – MediHeroes is pleased to announce the launch of IMDS Korea together with ARQon, Asian Regulatory & Quality Consultancy in Singapore and Asia Regulatory Professionals Association (ARPA). The official launch date of IMDS Korea is scheduled on December 01, 2020.

On June 16, MedTech experts and facilitators from Korea, Singapore and Hong Kong have attended an IMDS Korea Expert kick-off meeting at the MediHeroes office in Seoul. IMDS Korea Experts consist of APAC Siemens Digital Industries Software(Digital Transformation, Medical Devices Industry), Boditech Med, invites healthcare Co., Ltd, DAHAI Patent & Law Firm, CTNS & ARQon Korea (RA&QA Consultancy), YouthBio Global and Korea University Medical Device Innovation Center.

A voluntary group of experts with deep knowledge from different sectors are to give advice on IMDS training program, syllabus design, examination questions, certification, speaker recommendation. MediHeroes believes that IMDS will act as a channel to help Korean MedTech professionals network with their counterparts and find global partners for collaboration in Korea as well as overseas.

On Dec. 01, 2020, one-day program will be held on & offline for the Korean audience. In 2021, there will be two 2-days certificate programs, the basic program in the 1st half and the advanced program in the 2nd half. Medical Device School was launched by ARPA and in Singapore in 2019 with a huge success and Singapore Government funding support. They expect that IMDS participants will gain a comprehensive overview of medical devices lifecycle, from research and development stages to commercialization. "I aim to position IMDS Korea as a driving force to bring MedTech professionals with a different background together like a medical eco-system that IMDS Korea expert panels are trying to develop in a way or another. Our program should not be another college class. IMDS should go beyond that. Let's accelerate and motivate MedTech professionals with a challenging program so that we can help them jump to the next level. IMDS simply waters its participants so that they can grow on their own and build a global network by themselves," said Ms. Joanne Lee, a facilitator of IMDS Korea and a founder of MediHeroes, B2B Medical Platform on June 17, 2020.

## **About MediHeroes**

MediHeroes is a global B2B medical platform that aims to bring buyers, sellers & end-users of medical products & services onto a single transparent platform. The main business areas are medical e-commerce, e-medical fair and database services in the MedTech industry. Our vision is that MediHeroes become the most trusted information source in the MedTech industry.
